THE NATIONAL OBSERVATORY ON THE CLIMATE CRISIS

It is a space that manages the technical-political information generated by MINEC on climate change.

It was created from the proposal presented at the closing of the First National Congress of Researchers on Climate Change, held in May 2022.

The same year, in August, the National Climate Crisis Observatory was inaugurated.

MISSION

Contribute to the development of information, research and technology transfer on climate change, in order to generate diagnoses for the generation of results and recommendations that seek to generate public policies for the improvement of the quality of life of Venezuelans in the face of the effects of climate change.

VISION

To be a body that produces information to generate policies and actions to address climate change and minimise its impacts, as well as to collectively promote the construction and consolidation of socialism as the only option against the predatory, discriminatory and unsustainable model of capitalism.

AREAS IT DEVELOPS

RESEARCH

- SIGEPROCC
- Scientific Journal
- ONCC Bulletin
- Biophysical characterisation
- Global, regional and local climate behaviour
- Agreements, cooperation, projects.

EDUCATION

- National Awareness Plan
- Community Risk Maps
- National Reforestation Plan

MONITORING

- National Network of Community Weather Stations
- Monitoring of current atmospheric data (meteorological approach)
- Monitoring of historical atmospheric data (climate focus)
- National and international media spectrum monitoring

ACTION ON THE GROUND

- Participatory design workshops
- Adverse event care
- Climate Action Plan
